1-20-90

Mr. Weisberg,

In response to your letter of 1-17-90;

When I wrote you before, I had no idea who you were, your occupation, what your involvement or connection was or is to the JFK assassination investigation. My only reason for writing was in hopes of obtaining in published book form the FBI files; or perhaps information where this would be available. I only wanted to see what they looked like.

I wasn't aware that you were almost 77 years old nor that you were ill. I did not mean to inconvenience you.

You say that I have been mislead by the "lies" in John Davis' book. Well, when you are only 29 years old like me, it is very difficult to know who is telling the truth about the assassination and who isn't. There are so many books and so many theories, how can you know right from wrong. I have my own opinion about what happened but I don't try and force it on any one.

Thank you for your time.

Sincerely,
Sandy Grantham
